"Everything Would Be All Right if I Could See Her," Artist Pleads.

THE WEATHER REPORT

Official Forecasts and Records for Last Twenty-four Hours

Washington, March 25.—The Western disturbance of the last two days is moving very slowly toward the Mississippi Valley and the upper lake region. During the last twenty-four hours it has been subtended by a series of quite numerous depressions in the plains states, the upper lake region, the middle central valley and the east Gulf states, and the lower lake region, the Atlantic states and the extreme West. The weather was fair, except the northern Pacific states, where there were rains due to another disturbance now over British Columbia.

The temperatures are high for the season east of the Mississippi River, probably so in the greater part of the country. They are much lower in the Missouri Valley, Kansas and the west Gulf states, with freezing weather in Kansas, and higher in the West.

There will be showers and thunderstorms Sunday.

In the West, cold air from the north will extend

to the Gulf states extending Sunday night or Monday into the Atlantic states, and probably to the Mississippi River.

Temperatures will fall considerably with the arrival of the cold air, especially in the districts where indications of cold wave warnings have been ordered for Sunday and Monday.

For Sunday and Monday, North Atlantic and middle Atlantic moderate cold air from the west, Gulf moderate cold air from the northwest, and the interior east and southeast winds Sunday.

For Sunday and Monday, Mississippi Valley moving slowly east.

Forecasts for Special Localities—Western

Yours and Southern New England, partly cloudy to day, showers to-night or Monday; cooler Monday.

New England, fair to-day, cool Monday.

Western Pennsylvania, showers to-day or to-night, warm Monday, cold and cold.
